Sure. Are we each at liberty to do it as per preference? If we did it in a day, we would land in [REDACTED] at 8:00 AM, the facility is half an hour away from the airport, so say, there is congestion due to rush hour, we should still be able to make it there at 9:00AM. For domestic flights, we need to be there an hour early, so we would be able to stay at the facility till 11:00AM, if not 11:30. Generally, 2 hours at the facility should be enough. So, a one-day trip could work.

Ex. 6 Personal Privacy (PP)

Ex. 6 Personal Privacy (PP) I don't think we're facing major restrictions on travel funds, so unless it's just a personal preference i think we should plan on flying in the day before. I'm also not sure we'd be able to tour the facility and arrive back at the airport by 11:30am to catch a 1pm flight.

So, I looked at some actual times on June 7, and it seems there is an outbound flight at 5:38AM and an inbound flight at 1:04PM. We would have to leave super early, but we would be back at 5PM

If you could just double check with Charlotte that would be great, to let her know 1) that they do synthetic turf fields primarily and 2) this will likely require a 1-2 night stay per person (we are ok travel budget wise? How many people from RCSD can we send?). Thanks. Charlottes out tomorrow-Monday so if u can confirm today that would be great.

Subject: tire facility

Hi, Charlotte thought that at this point it was more important the third facility we visit actually produce tire crumb primarily for use in synthetic turf fields, since the previous two facilities largely had other markets, over a cryogenic vs. ambient facility. Does [REDACTED] process for turf fields?
